Feature ID	Description	Details	Status	Cloud Instance	Added to Roadmap	Estimated Release
70704	Microsoft Lists: Mobile App (Android)	Access all lists you own and that have been shared with you - all on the go. You'll be able to create new lists, edit list items and easily share with other people.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	December CY2021
70711	Microsoft 365 Compliance Center: Insider Risk Management supports fine-grained role-based access control	Insider Risk Management will now limit visibility of alerts and cases related to priority users to specific IRM Analysts or IRM Investigators.	In development	Worldwide	2021-03-02	March CY2021
70712	Microsoft 365 Compliance Center: Insider Risk Management supports native triggers	The Microsoft 365 Insider Risk Management solution will now leverage native triggers for Data Leak or Departing Employee Data Theft policy templates.	In development	Worldwide	2021-03-02	March CY2021
70713	Microsoft 365 Compliance Center: Insider Risk Management supports sequencing	Insider Risk Management will improve fidelity of detections by looking for sequences of events over time. Sequences include collection followed by data exfiltration, obfuscation before exfiltration, or exfiltration followed by cleanup.	In development	Worldwide	2021-03-02	March CY2021
70714	Microsoft 365 Compliance Center: Policy health check for Insider Risk Management	Insider Risk Management will now surface policy status to identify misconfigured policies which could impact detections.	In development	Worldwide	2021-03-02	March CY2021
70715	Microsoft 365 Compliance Center: Enhanced user management in Insider Risk Management solution	We're improving the experience around manually adding or removing users from Insider Risk Management policy scoring scope.	In development	Worldwide	2021-03-02	March CY2021
70716	Microsoft 365 Compliance Center: Enhanced policy creation wizard for Insider Risk Management	We're improving the experience of Insider Risk Management policy creation, including enhanced guard rails to enforce proper policy configuration.	In development	Worldwide	2021-03-02	March CY2021
70717	Microsoft 365 Compliance Center: ServiceNow template for PowerAutomate available within Insider Risk Management	A ServiceNow PowerAutomate template will be provided to integrate Insider Risk Management with ServiceNow.	In development	Worldwide	2021-03-02	March CY2021
70719	Outlook: Suggested replies for government licenses	We are rolling out suggested replies for customers with government licenses in GCC. Replies will be available in English, Spanish, Portuguese, Italian, French, German, and Chinese (People's Republic of China).simplified.	In development	GCC	2021-03-02	April CY2021
70734	Microsoft Forms: Manage and organize your forms and quizzes now	Forms organization allows user to manage and group all forms/quizzes in their own way to efficiently archive and categorize their forms.	In development	Worldwide	2021-03-02	April CY2021
70746	Outlook on the Web: New calendar board view	With Outlook Calendar board view people can organize and manage their time, beyond the hour to hour time slots in a redesigned free-flow view of the things that are important.	In development	Worldwide	2021-03-02	April CY2021
70747	Exchange: Scheduler for Microsoft 365	Scheduler is a new service from Microsoft 365 that allows Cortana to schedule your meetings by negotiating a time that works for you with people inside and outside of your organization. Scheduler will be available in English only in this release.	In development	Worldwide	2021-03-02	May CY2021
70748	Microsoft Lists for iOS: iPad support	Microsoft is expanding device support on iOS to now include iPad. Microsoft Lists for iOS looks great on iPhone and iPad, scaling the user-friendly user interface to give you the best access to create, edit and share your information from your iOS device.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	March CY2021
70749	Microsoft Lists app in Teams: Rules	Create simple if/then rules, based on changes to list information, to set reminders and send notifications directly from within Microsoft Teams. Users with edit permissions on the list can create and manage rules. Users with read-only permissions can't create or manage rules. Once the feature is available to your users, they'll be able to create a rule by selecting the Automate menu, and then click "Create a rule" in the list command bar near the top of the page.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	March CY2021
70750	SharePoint: Calendar view in Lists web part	The List web part for SharePoint in Microsoft 365 allows you to display a list from your team or site on a page and customize it with your own title, view, and even size. And now, if you have created a Calendar view for your list, it will show properly in the List web part.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	March CY2021
70751	Microsoft Lists: Smart people picker	When you type in the people picker, the autofill suggestions will come from Microsoft Graph. This makes it the people picker more personalized and relevant based on who you work with most often.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	March CY2021
70752	Microsoft Lists: iOS InTune support (MAM CA)	Microsoft is currently working on getting the Lists app for iOS into the Intune console, for Mobile App Management (MAM) policies. Learn more how to enable Intune app protection policies (APP) with Microsoft Lists; : https://techcommunity.microsoft.com/t5/intune-customer-success/support-tip-how-to-enable-intune-app-protection-policies-app/ba-p/2100061.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	March CY2021
70753	Microsoft Lists: Custom list templates	Today, we have several ready-made List templates designed to make it easy to get started tracking and managing information – like events, issues, and requests. We're pleased to announce that we will be supporting custom list templates - the ability for organizations to define custom list templates. Note, you will be able to manage which templates are available to which people, based on their job role.	In development	Worldwide, GCC, Germany, GCC High, DoD	2021-03-02	May CY2021
70789	Microsoft Information Protection: Mandatory labeling in Office apps for gov clouds	Office apps (Word, Excel, PowerPoint, Outlook) will now respect the Admin policy setting to require users to apply a label to documents and emails on Windows, Mac, iOS, and Android (for the Office 365 subscription version of the apps).	In development	GCC, GCC High, DoD	2021-03-02	March CY2021
71061	Outlook: Suggested times for iOS	When scheduling a meeting with colleagues, Outlook automatically provides time suggestions that makes it easy to find a time that works for everyone.	In development	Worldwide	2021-03-02	March CY2021
68076	Outlook: Suggested times for Android	When scheduling a meeting with colleagues, Outlook automatically provides time suggestions that makes it easy to find a time that works for everyone.	In development	Worldwide	2021-03-02	March CY2021
70754	Microsoft Teams: View switcher	The new view switcher in the top bar of a Teams meeting allows participants to control how they prefer to see the meeting content. Choose between Together mode, Focus, Gallery at top, and Full screen.	In development	Worldwide	2021-03-03	March CY2021
70755	Microsoft Teams: New Search experience in mobile app	When searching in the Teams mobile app, you will receive suggestions as you type. You will also be able to scroll to past and future dates in the calendar using a date picker.	In development	Worldwide	2021-03-03	April CY2021
70756	Microsoft Teams: Mobile app visual update	The Teams mobile app will get a new visual look and feel that delivers new headers, icons, and styling along with the ability to automatically switch to dark theme when you set your device to dark.	In development	Worldwide	2021-03-03	April CY2021
70757	Microsoft Teams: Organize chats in mobile app	In the Teams mobile app, you will be able to pin chats and filter the Chat list.	In development	Worldwide	2021-03-03	April CY2021
70758	Microsoft Teams: Emoji library and GIFs in mobile app	In the Teams mobile app, there will be an expanding library of emojis, and the ability to trim GIFs directly in the app.	In development	Worldwide	2021-03-03	April CY2021
70759	Microsoft Teams: Operator Connect	Operator Connect is a new way for customers to simply and quickly enable PSTN calling for Teams, using services from non-Microsoft telephony operators. Administrators can select their desired operator in the Teams Admin Center, and provision phone numbers to their users in just hours, with no required hardware.	In development	Worldwide	2021-03-03	April CY2021
70760	Microsoft Teams: Operator Connect Conferencing	Operator Connect Conferencing allows you to add telecom operator dial-in numbers to a Microsoft Audio Conferencing bridge. You can maintain your preferred telecom operator relationships, diversify your PSTN infrastructure to include additional telecom operators, and take advantage of expanded geographic dial-in coverage.	In development	Worldwide	2021-03-03	April CY2021
70761	Microsoft Teams: Cortana and Bing skills on Teams display	The Cortana skills within the Teams display have been enhanced to include Bing productivity integrations. Now, a user can leverage voice commands to ask Cortana things like "What's the time and weather in New York?" or "How many rupees are in a dollar?" without needing to disrupt the flow of work.	In development	Worldwide	2021-03-03	March CY2021
70762	Microsoft Teams: Intelligent speaker for Microsoft Teams Rooms	Teams intelligent speaker for Microsoft Teams Room can identify and differentiate the voices of up to 10 people talking in a meeting room. With these new speakers, attendees can use the transcript to follow along or capture action items.	In development	Worldwide	2021-03-03	April CY2021
70763	Microsoft Teams: Intelligent detection and remediation for Microsoft Teams Rooms	AI based remediation of Microsoft Teams Rooms device health issues, made available as part of the managed service in Microsoft Teams Rooms Premium	In development	Worldwide	2021-03-03	April CY2021
70764	Microsoft Teams: Personalized room planning for Microsoft Teams Rooms	Curated room planning recommendations tailored to customer's environment and based on historical performance data available as part of the managed service in Microsoft Teams Rooms Premium	In development	Worldwide	2021-03-03	April CY2021
70765	Microsoft Teams: Threat detection & Security update management for Microsoft Teams Rooms	Room threat protection (Microsoft Defender for Endpoint) and orchestrated security updates to heal vulnerabilities on Microsoft Teams Rooms. This is available as part of the managed services in Microsoft Teams Rooms Premium	In development	Worldwide	2021-03-03	April CY2021
70766	Microsoft Teams: Microsoft Teams Connect	Collaborate with people and teams that span different organizations. With Teams Connect, seamlessly share channels with any user or group with Azure Active Directory identity.	In development	Worldwide	2021-03-03	June 2021
70767	Microsoft Teams: Teams and Dynamics 365 business process experience	Take advantage of Teams capabilities like chatting, sharing documents, and managing meeting and webinar invites without leaving Dynamics 365 workspace. You can also securely access, update, and share Dynamics 365 records from within Microsoft Teams.	In development	Worldwide	2021-03-03	April CY2021
70768	Microsoft Teams: Approval templates	New out-of-the-box templates provide a repeatable structure for common approvals such as leave, expense reports, or overtime requests. Admins and team owners can use these as is, customize, or create brand new templates.	In development	Worldwide	2021-03-03	April CY2021
70769	Microsoft Teams: App customization and branding	Now you can customize app properties like app name, description, icons, and more to deliver a branded app experience right within Teams.	In development	Worldwide	2021-03-03	March CY2021
70770	Microsoft Teams: Interoperability with Azure Communication Services	Use Azure Communications Services to deliver a better customer experience by easily connecting users of a custom-built app with users on Microsoft Teams via voice, video, or chat.	In development	Worldwide	2021-03-03	May CY2021
70771	Microsoft Teams: Automation templates in Teams app store	A new "Automation" category will be added to the Teams app store full of new Power Automate templates, providing an easy starting point for your automation workflows.	In development	Worldwide	2021-03-03	March CY2021

Feature ID	Description	Details	Status	Cloud Instance	Added to Roadmap	Estimated Release
70772	Microsoft Teams: Updates to Dataverse for Teams limits and upgrades	We are increasing the Dataverse for Teams environment limit for larger tenants from the current 500 to 10,000. Also, you will be able to seamlessly upgrade your Dataverse for Teams environments to take advantage of the full premium license capabilities—your existing apps and data are to go	In development	Worldwide	2021-03-03	March CY2021
70773	Microsoft Teams: Teams user usage report in Teams client	The Teams user usage report provides users a view into their Teams activities and usage. A user can generate insights and metrics on a per-team and cross-team basis to understand their interaction with peers and across the organization. The reports are generated with privacy in mind, so only the individual user can view their own data.	In development	Worldwide	2021-03-03	April CY2021
70774	Microsoft Teams: Anonymous user usage reports	While all Teams reports can only be viewed by approved roles, an extra layer of data privacy will be added. Teams admins will have the option to anonymize user data, protecting user privacy while viewing, downloading, sharing, and accessing the Teams usage report data. Once enabled, personally identifiable information like username, email addresses, and Active Directory IDs will be anonymized.	In development	Worldwide	2021-03-03	April CY2021
70775	Microsoft Teams: App risk evaluation	Teams admins will be able to view the security, compliance, and data privacy details for apps coming from Microsoft Cloud App Security. This will help Teams admins save time on security reviews and enable a more focused selection-based security specifications, resulting in increased app quality.	In development	Worldwide	2021-03-03	April CY2021
70776	Microsoft Teams: Custom policy packages	New custom policy packages will enable Teams admins to configure their own set of policy packages tailored to users with similar roles in their organization. We are also adding the capability to assign policy packages to a group so you can assign multiple policies to a group of users.	In development	Worldwide	2021-03-03	April CY2021
70777	Microsoft Teams: Real-time telemetry for meetings	New real-time telemetry for meetings enables IT Admins and helpdesk to troubleshoot problems during meetings or events for Microsoft Teams. The data is generated in Teams Admin Center reports and Meetings reports and provides detailed information about different network parameters like Jitter, Packet-loss, latency and Frames per second.	In development	Worldwide	2021-03-03	April CY2021
70778	Microsoft Teams: Scheduled access reviews for Guest users	Scheduled access reviews for guests will streamline the experience of managing Guest users. The system will automatically schedule periodic guest access reviews across Teams, delivering better identity security hygiene. Scheduled access reviews will be turned on by default.	In development	Worldwide	2021-03-03	March CY2021
70779	Microsoft Teams: Teams Connect in Teams Admin Center	With Teams Connect, teams can collaborate with people from different organizations. With Teams Connect, seamlessly share channels with any user or group with Azure Active Directory identity. Admins will have access to granular controls in Teams Admin Center, allowing their organization to stay in control of how external users access data and information.	In development	Worldwide	2021-03-03	June CY2021
70780	Microsoft Teams: End-to-end encryption option for Teams 1:1 VoIP Calls	Teams will support an option to use end-to-end encryption (E2EE) for ad hoc 1:1 Teams VoIP calls, providing an additional option for conducting sensitive online conversations. To support customer security and compliance requirements, IT will have full control of who can use E2EE in the organization.	In development	Worldwide	2021-03-03	May CY2021
70781	Microsoft Teams: Safe Links for Teams	Safe Links helps protect your business against malicious sites when people click links in Office apps. This will also be available in Microsoft Teams.	In development	Worldwide	2021-03-03	April CY2021
70782	Microsoft Teams: Co-author in encrypted docs using Office Apps	Multiple users can now simultaneously edit an Office document that has been encrypted using Microsoft Information Protection, including using AutoSave. Co-authoring in encrypted docs is supported through the Office apps, Office Web Apps, and Teams.	In development	Worldwide	2021-03-03	March CY2021
70783	Microsoft Teams: Teams Multi-Geo Support	To help customers meet data residency requirements, Microsoft 365 Multi-Geo has been extended to include Microsoft Teams, allowing organizations to specify where their Teams customer data sits, down to the team and end user.	In development	Worldwide	2021-03-03	April CY2021
70784	Microsoft Teams: Task publishing checklist	Task publishing enables corporate teams to create and publish tasks to, for example, all frontline locations and other configurable attributes of a distributed workforce. Now, corporate teams have the ability to add a checklist to the tasks they publish, enabling them to add rich details on what needs to get done within each task and drive deeper clarity from top down.	In development	Worldwide	2021-03-03	March CY2021
70785	Microsoft Teams: Task publishing editing	Task publishing enables corporate teams to create and publish tasks to, for example, all frontline locations and other configurable attributes of a distributed workforce. Corporate teams can now edit published tasks without having to recall the entire task list.	In development	Worldwide	2021-03-03	March CY2021
70786	Microsoft Teams: Low data mode	Whether you want to preserve data or are in a location with a poor or limited network connection, sometimes it's helpful to limit the amount of data you're using during a video call. A new low data mode allows users to cap the amount of data that will be used during Teams video calls as well as establish different settings based on network availability.	In development	Worldwide	2021-03-03	March CY2021
70787	Microsoft Teams: Attachments to approvals	Attach files to approvals directly from OneDrive and SharePoint, or attach a generic link to content hosted outside of Microsoft 365. Approval is connected to the latest version of the file.	In development	Worldwide	2021-03-03	April CY2021
70788	Microsoft Teams: Markdown support in approvals	For approvals, use Markdown formatting in adaptive cards and the details view, to ensure all approvals are formatted correctly.	In development	Worldwide	2021-03-03	April CY2021
70726	Microsoft Planner: Recommended Plans	We are introducing a new Recommended section in Planner to help users find plans that are most relevant to them. This section will contain new plans with tasks assigned to the user. It can be seen in the Planner hub and in the left pane between Favorites and Recent.	In development	Worldwide	2021-03-05	March CY2021
70730	Microsoft 365 Compliance Center: Data loss prevention (DLP) data surfaced in Activity Explorer	DLP-related data sets which currently flow into Microsoft 365 Audit logs will now also surface within Activity Explorer under an activity called 'DLP rule matched'.	In development	Worldwide	2021-03-05	March CY2021
70731	Microsoft 365 Compliance Center: Recommendation widget for Teams DLP	A new recommendation widget will appear within the Microsoft 365 compliance center to guide admins in creating a packaged Teams DLP policy if they currently have no policy related to Teams DLP in their policy portfolio.	In development	Worldwide	2021-03-05	March CY2021
70745	Microsoft 365 admin center: Microsoft Browser Usage Report	This new report will allow IT admins to view aggregated Microsoft browser usage reports through the Microsoft 365 Admin Center to help them understand browser usage trends in their organization and plan their migration to Microsoft Edge.	In development	Worldwide	2021-03-05	March CY2021
70799	SharePoint: Portal launch scheduler UX	The Portal Launch Scheduler is designed to help you follow a wave / phased roll-out approach by managing the redirects for the new portal. During each of the waves, you can gather user feedback and monitor performance during each wave of deployment. This has the advantage of slowly introducing the portal, giving you the option to pause and resolve issues before proceeding with the next wave, and ultimately ensuring a positive experience for your users.	In development	Worldwide	2021-03-05	April CY2021
80684	OneDrive: Exclude specific files from sync on macOS	Admins can exclude newly added files from syncing to the cloud by file name or extension on macOS.	In development	GCC, Worldwide, Germany, GCC High, DoD	2021-03-05	April CY2021
80993	Yammer: General Availability of AzureAD-B2B guests in Yammer communities	AzureAD-B2B guest support in Yammer communities will be generally available. Invite guests to your Yammer community and facilitate rich conversations between members and guests of a Yammer community.	In development	Worldwide	2021-03-05	March CY2021
